**Quotation "Transfer of the Log Robot to a new web space"**

Dear Mr. Verleijen,  
with reference to your emails concerning the Log Robot, I am pleased to submit my quotation as follows:

***Scope of services:***

Transfer and configuration of the existing contest robot software (production and test environment) to a new web space with the system requirements (Linux, php 7.2, mysql), server availability is 99,8%. An SSL certificate (Let's encrypt) will be provided free of charge. If the IARU wants a specific certificate, the costs for installing that certificate will be added to the costs.

***Costs***

Transfer and configuration is EUR 550,00 plus VAT.  
The yearly cost of hosting the software and data is EUR 600,00 plus VAT, yearly payable in advance.

***Schedule***

The schedule to transfer to the new server depends on the date of the order acceptance (holidays, vacation, etc.). A binding schedule can be provided as soon as the offer is accepted.  
A working DNS entry for the contest robots URL has to be made by the IARU DNS administrator before the setup can be started (IPv4 will be provided after order acceptance, please don't use IPv6).  
After this the transfer can start, it will be completed within 4 work days.

***Terms of payment***

Payment without deduction upon completion of the transfer; default interest of 5% p.a. shall be deemed as agreed. Yearly cost of hosting payable too as soon as transfer is completed.

***Validity of the quotation***

This quotation is valid until 31.12.2020.

I hope this price quote meets your expectations. Please return a signed copy of this document to me as a sign of your consent. The general terms and conditions apply: <http://indiware.com/download/agb.pdf>

In case of questions to not hesitate to contact me by phone at 0699/126-23-122 or by email at [office@indiware.com](mailto:office@indiware.com).

Best regards,

  
Ing. Barbara Langwieser, BSc.
